Aku pgen jadi pemain sinetron ka...m'tsblumx kma mgkin ini khatan lелоcon tpi ini un serius ini cita2 un dri kiz 1/2 smp...
-  Mediaa Wahyudi Askar 11/07/2014 11:04  
gapapa, jangan pernah sangsi atas cita2 yg kita miliki  
nanti klo kk kelemu org2 yg bekerja di bidang itu kk kasih tau cari peluang y  
sementara fadly bisa asah kemampuang actingnya  
satu hal, kita punya hak untuk menentukan cita2 kita, jngan pernah takut  
kejar itu  
kejar itu

Huawei E177u 1 Zain Sudan Unlocker Description Unlock your Huawei E177u 1 Zain Sudan, a fast and stable broadband modem. Easy to use, just enter. Huawei Technologies Co. (HK) Ltd.(CNN) -- The International Space Station flew by Mars Monday, venturing close to the planet's surface and showing a rare close-up of the Red Planet. NASA's Mars Global Surveyor spacecraft is seen from the International Space Station as it passes by Mars on Monday. Monday marked the second time a spacecraft from Earth has passed by Mars. The first time was in 2003, when Mars Global Surveyor performed a flyby of the planet. "It is an honor to fly so close to Mars," said Ellen Ochoa of NASA's Goddard Space Flight Center in Greenbelt, Maryland, who was the flight engineer for the Mars Global Surveyor mission. "But it's also an important mission because we learn about the planet itself. I can tell you what the winds are like, and the temperature of the atmosphere, and how much atmosphere is there. Mars is the best of all worlds for learning about planets -- it's Earth, but also a planet in a way that's familiar to us." Ochoa said one Mars Global Surveyor image in particular stood out. "I like the reddish hue of the planet in the picture," she said. "It was captured by a lander, which landed on Mars in 1999. You can see the lander in the image, too." Another Mars Global Surveyor image showed an impact crater on Mars' surface, the spacecraft's first image of such an impact crater. The Mars Global Surveyor collected high-resolution images of the surface of Mars from 2001 to 2006. "If you look really closely, you can see the edge of the crater," Ochoa said. "The lander recorded this image, and was able to pick up the dust, which is the edge of the crater. As the lander drove down, the dust moved away, leaving the crater, just like if you were 82157476af
